

# IDENTITY GUIDELINES

# INTRODUCTION

# HELLO, WE ARE MARITA

Marita is an **AI-powered financial analyst** platform built for global startups & investors.

It audits financial reports, reads between the lines, and surfaces patterns others miss—connecting dots, exposing anomalies, and making complex data usable.

Because decisions break when the numbers lie—or when no one sees what's actually there. Marita cuts through noise, sharpens judgment, and gives you the confidence to act on what's real.

# CLARITY IS CONTROL

The philosophy behind everything we build is simple: better decisions start with seeing what's real. Financial data is everywhere—but **truth is not. Noise hides signal. Complexity hides risk.** Marita cuts through both, turning data into clarity—revealing what's there, what's missing, and what doesn't add up.

Because when you see clearly, you decide differently—faster, sharper, with control. As complexity scales, clarity becomes leverage. And control becomes everything.

# DATA-DRIVEN<sup>1</sup> CLARITY<sup>2</sup> THAT REVEALS TRUTH<sup>3</sup> AT SCALE<sup>4</sup>

01

We turn financial noise into signal—  
never assumptions.

02

We make complex financials instantly  
legible.

03

We expose what the numbers actually  
say, not what they suggest.

04

Scaling isn't growth—it's control.  
We help you stay sharp as complexity  
compounds.

# COMMUNICATION

01

# DIRECT

We get to the point. Fast.  
Even complex ideas are expressed in clear, conversational language that moves with intent. Every word earns its place—and drives somewhere.

02

# INTELLIGENT

Grounded in expertise, we don't over-explain or dilute. We assume a sharp audience and meet them there—precise, structured, and confident in what we know.

03

# INTREPID

We challenge assumptions, question the obvious, and push for better ways of thinking. Different isn't the goal—truth is.

## Say what matters

Lead with signal, not setup. Get to the point fast. Cut filler, drop jargon, and make every sentence carry weight. If it doesn't move the idea forward, it doesn't stay.

## Make it clear

Clarity is the standard. Break down complexity without dumbing it down. Use simple, precise language that anyone sharp can follow—no second reads required.

## Sound like you know

Write with conviction. No hedging, no overexplaining. We assume an intelligent audience—so we respect their time and meet them at that level.

## Be concise

Shorter is stronger. Say it once, say it right. Aim for precision over volume. If you can remove a word, do it.

## Stay consistent

Same tone, everywhere. From product to marketing to reports. One voice—clear, intelligent, and unshakably direct.

**TYPOGRAPHY**

Marita uses Plus Jakarta Sans as its primary typeface, and it should be applied consistently across all brand communications to maintain a clear, unified voice. It’s not interchangeable —do not replace it with other fonts.

# LOGO

The Marita logomark is the core symbol of the brand and should always remain clear, legible, and instantly recognizable across every application.

60px

The Marita logotype is the full wordmark and should be used whenever the brand name needs to be clear and readable. Always present it in its original form—no changes to type, weight, or spacing.

Marita

The Marita lockup combines the logomark and logotype and should be used when the full brand name needs to appear alongside the symbol. Keep the relationship intact—do not adjust the spacing or alter the arrangement.

The Marita logo must always have clear space around it to stay visible and uncluttered. Use the height and width of the logomark as the minimum clear space on all sides, and do not place any text or graphics within this area.

x.x

Logo  
Logo Color

The Marita logo should only appear in Marita Black, Marita Green, or Marita White. Use the Marita Black logomark on light backgrounds and the Marita White logomark on dark backgrounds. Do not use unapproved colors.

The integrity of the Marita logo must always be protected. These rules define what not to do—so it stays clear, consistent, and instantly recognizable across every application.

Do not use color combinations that make the logomark illegible.

Do not use different color for the logotype and the symbol.

Do not disproportionately stretch or wrap the logo.

Do not stylize or alter the logo including outlining it, adding a drop shadow or bevel, or any stylistic effect.

Do not scale, reposition, or modify the logo in any way.

Do not place the logo over images which make the logomark illegible or use in any color other than white or black when being placed on top of an image.
